- Custom Theme Developmenti
- Elementor,WPBakery

STRENGTHS:

- Expert in backend architecture and custom theme building.
- Proficient in hybrid mobile development technologies.
- Excellent communication skills

MY OPEN-SOURCE WORK

Spice Shack

Spice Shack, previously known as I-Gril, was popular in the town and the neighborhood cities for its phenomenal taste. This is a hybrid application designed for both Android and iOS using React Native, with a robust backend developed in Node.js.

Attendance App

Attendance app where a company registers employees and marks their attendance using facial recognition. The company manager can view the location of attendance. This is a hybrid application designed for both Android and iOS using React Native, with backend services deployed on AWS for facial recognition.

CRM

CRM is a web-based software deployed in a software house where admins can manage their leads and projects, add tasks, and view the reports of every single employee in the office. The backend is developed using PHP and Laravel for efficient data handling and processing.
